Liquidarium

Vera Möller is inspired by wetlands!

A wetland is the area around lakes and rivers. Many plants and animals live and grow in the wetland areas. Did you know that another name for plants and animals is *Flora and Fauna*?

Vera has created a new wetland in this room to show you what life is like in the wetlands from the point of view of a frog – that's me! Did you know: *Point of View* means the way that you see things!

Activity Create your own Wetland creature!

1. Go outside and find a leaf. Look at its patterns, look at the shape, look at the colours! In BOX A draw the shapes and lines that you see on the leaf.
2. Which animals do you think live around a wetland? A frog, like me? A bird? A fish? Maybe an insect! In BOX B, draw your favourite wetland animal!
3. Time to combine! In BOX C mix your patterns, shapes and animals to create a brand new animal for your wetland.
